

For over 21 years, Kist Electric LLC. has been a trusted and qualified electrical company in the Ohio, Indiana, and Kentucky area. Our success has come from an unrivaled commitment to always meeting and/or exceeding our customer's expectations. This is done by performing quality and on time work with the utmost professionalism and honesty. We work hard on keeping up with technologies and always developing new ways to complete all services efficiently. Our achievements speak for themselves by the continual word of mouth advertising that we receive. These attributes that we alone bring to the jobsite are what gave us the ability to build the strong presence in the Industrial, Commercial, and Residential markets that we have attained.

Kist Electric LLC. has a certified electrical license and prides itself on participating in a drug free workplace program. We mandate that Job Foremen have their 40 hour OSHA card, and require all laborers to have their 10 hour card. We have two certified installers and service technicians for Generac Generators. Presently we are in the process of getting our Solar Energy License.

Commercial/ Industrial- Kist Electric LLC. has a wide customer base in these two markets ranging from fast food chains to an amusement park. We specialize in Energy Management Controls and Electrical Maintenance, but do not limit ourselves to only those areas of expertise.

Below please find a small cross-section of our clientele base to be used as references.
